

Favorites Module

March 15th 2010 rollout. Version 1.7.1.1

Goal of the document

This document explains the objectives and functionalities of the new module **Favorites**.

What is the Favorites module?

The ideal and complete logbook should have a comment for each completed trip, which implies a fastidious and demanding task. In order to refine the logbook, Odotrack has created a module that enables automatic comments for a chosen destination.

The Favorites module can:

1. Automatically generate a comment for a selected trip and vehicle.
2. Automatically set the type of trip (business or personal) for a precise location.
3. Apply Favorites rule to all completed trips.

Functionality

| Vehicles | | Start Date | End Date | Trip type | | | Active | Status | Sync batch |
|------------------------------|--|--|------------------------------|-----------|--------|----------|----------|--------------|------------|
| Select vehicle(s) > | | 03/04/2010 | | All | | | Yes | All | All |
| Start | Address of departu... | Address of destinat... | End | Km | Hr/min | Type | Vehicles | Stop | Comments |
| Mar 11 2010 8:13 AM (EST) | Rue Étienne-Bouchard, Montreal, Quebec, | Aut-440 O, Laval, Quebec, H7P, Canada | Mar 11 2010 8:41 AM (EST) | 25.27 | 0h 27m | Personal | Mazda 6 | ✓ | |

Illustration 1: Logbook without comments

In the logbook above, there are no comments. At three instances, the place of arrival is a company on Highway 440 West in Laval. To automatically have the comment « Fruit Delivery » and « Business Trip » to all trips with this company as the destination point, follow these steps:

1. Click on the configuration icon – **Tools** () – to view the **Favorites** window.
2. The following window will be displayed :

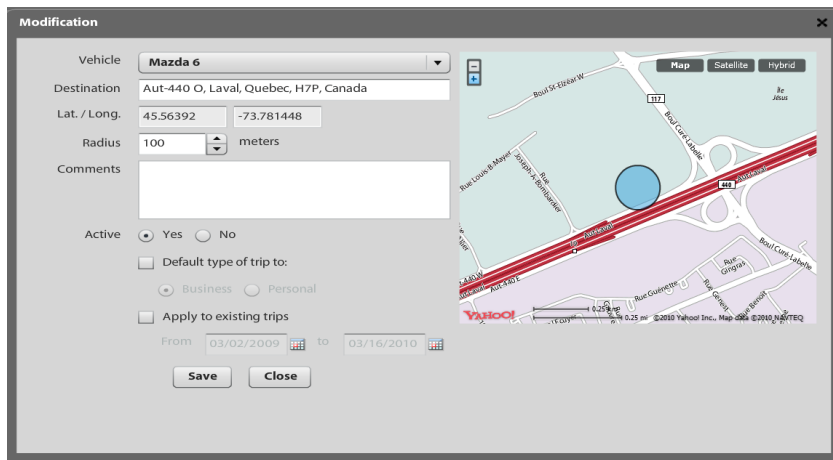

Illustration 2: Edit Favorites window

The Edit **Favorites** window contains the following fields:

- a) **Vehicle:** The *Favorite* will be applied on the selected vehicle.
- b) **Destination:** Address of arrival point. This field is editable. Enter an address and the search result will display on the map on the right side of the window.
- c) **Lat. / Long.:** Latitude and longitude coordinates of the destination. This field is not editable.
- d) **Radius:** Defining the range of the *favorite*. A radius of 100 meters – see the blue circle on the map – indicates that all trips with an arrival point of less than 100 meters will be considered.
- e) **Comments:** Information that will automatically be added to all trips with this destination.
- f) **Active:** Status of the Favorite: active or not.
- g) **Default the type of trip to:** If this checkbox is selected, the type selected – business or personal – will prevail the option chosen in the vehicle. Therefore, someone who knows they travel to a certain destination only for business purposes can select “Business” for this Favorite and not have to select the type of trip each time for this same destination.
- h) **Apply to existing trips:** By activating this option, you apply this *Favorite* to all existing trips for the chosen period.

The screenshot shows a 'Modification' window with the following fields and values:

- (a) Vehicle: Mazda 6
- (b) Destination: Aut-440 O, Laval, Quebec, H7P, Canada
- (c) Lat. / Long.: 45.56392, -73.781448
- (d) Radius: 100 meters
- (e) Comments: Fruit Delivery
- (f) Active: Yes No
- (g) Default type of trip to: Business Personal
- (h) Apply to existing trips: From: 03/04/2009 to: 03/11/2010

Buttons: Save, Close

Illustration 3: Input of information for the Favorite

New module | FAVORITES

As an example, in the previously mentioned case, the user would enter, in the **Comments** field, « Fruit Delivery », for all trips to the company located on Highway 440. To define all these trips as business trips, the user would select **Default the type of trip to:** and would then select **Business**.

To apply this trip to all previous trips to the same address, the user would select the option **Apply to existing trips** and would conclude by pressing **Save**.

After the Favorite setup, the three trips show the comment as well as the type of trip selected. Furthermore, to indicate that this destination is in the **Favorites**, the Tools icon () is replaced with a star.

By checking **Yes** to the **Active (f)** option, all future trips for this destination and with the selected vehicle, will automatically display this comment, display as a business trip and have a star.

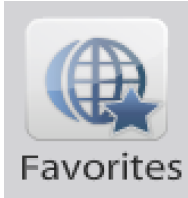

| Vehicles | | Start Date | End Date | Trip type | | Active | Status | Sync batch | | | | | | |
|--------------------------|------------------------------|--|--|------------------------------|-------|--------|----------|------------|---------|----------------|-------------------------------------|---|---|---|

Illustration 4: Trips with the programmed comments added to favorites

Quick modifications to favorite from the register

By clicking on the star, the Edit **Favorites** window will open. The user will be able to **edit the parameters of the Favorite**. For example, change the comment, modify the radius, etc...

View and Edit Favorites

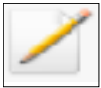

All existing Favorites can be viewed from the **Favorites** icon located on the navigation bar to the left of the interface.

This section is used to view, modify, delete and add Favorites.

| Comments | Vehicle | Destination | Radius | Force type | Active | Added | Modified | | |
|----------------|---------|---------------------------------------|--------|------------|--------|-------------|-------------|--|--|
| Fruit Delivery | Mazda 6 | Aut-440 O, Laval, Quebec, H7P, Canada | 100m | Business | Yes | Mar 16 2010 | Mar 16 2010 | | |

Illustration 5: Favorites section displaying all Favorites

Quick modifications to favorite from Favorites

The favorites can be modified directly from the Favorites table.

To edit a Favorite and have access to all options, click on the **Edit** icon.

| Comments | Vehicle | Destination | Radius | Force type | Active | Added | Modified | | |
|----------------|---------|---------------------------------------|--------|------------|--------|-------------|-------------|--|--|
| Fruit Delivery | Mazda 6 | Aut-440 O, Laval, Quebec, H7P, Canada | 125 | Business | Yes | Mar 16 2010 | Mar 16 2010 | | |
