

NEW ODOTRACK ON YOUR MOBILE PHONE

LAVAL, April 19th 2010: This week, **LOGICIEL FISCAL VL INC.**, maker of the **Odotrack** technology, has launched their new feature, the **Odo Mobile**, which allows **Odotrack** users to access their account through their smartphone. This progress puts Quebec companies on the map in this mobility era.

Accessibility at your fingertips

Odotrack, already renowned for being simple and efficient, raises the standards once again by offering a mobile gateway to all its users. Keeping a mileage logbook is now easier than ever since the user can edit comments, enter expenses, and update the odometer value directly from their mobile phone.

Odotrack, overcomes the technological constraints of mobile phones and offers, not only an application, but a tax tool. The information available through the mobile phone comes from an independent device which is always left in the vehicle, therefore providing an **automatic, reliable and worriless logbook**.

About Odotrack

Odotrack is a tool designed for people who use their vehicle for work. Not only does the Odotrack provide you with a logbook compliant to governmental requirements, but it also contains many other applications to help you simplify the management of travels. The user can, among other things, manage vehicle expenses, view routes, and generate a variety of tax and management reports with *one click*.
